

Introduction

Research shows that in Milton Keynes:

60% of young people think that if they went to the doctor on their own their parents would be able to find out.

95% of young people have never heard of the NHS Constitution.

The Young People's Healthwatch Milton Keynes group wants all young people in the city to know their rights under the NHS Constitution. This leaflet has been produced in consultation with young people on the group to tell all young people about their rights when they access health care.

Healthwatch Milton Keynes would like to thank Amber S, Paris W, Rebecca A, Amber J-S and Rochelle C for their input into this leaflet.

Know your rights
when getting health care

Choice

... make appointments with a doctor you like and to know about your choices

Confidentiality

... keep everything private

You have a right to...

Involvement

... be involved in decisions about how you are treated and not have treatment you don't want

Equality

... get free treatment and medicines* without discrimination if and when needed

* Free medicines if you are under 16 or 16-18 and in full time education

Give feedback

... give feedback about the service you have received

Safety

... safe care and a good experience
